Oriental Stone

Feature Name : **Mountain Lantern** website code **1229**

This range of fountains are the best reproductions I have seen, exactly like the real thing to the smallest detail, they are constructed from fiberglass containing either, crushed stone, faux Bronze, Aluminum etc, so offering immense strength along with light weight. The finish is not added as an afterthought like most products of this type, instead they are incorporated during the moulding process. The Iron finish in the iron range is predominantly real metal, this means that left untreated, they will rust! This product should be treated like any other metal product: for a shine, buff it with steel wool or a buffing pad. Maintaining a thin coat of oil on the item will also help prevent rusting, or you may also paint or spray the product with an acrylic sealer for extra protection against rust. These products are durable and weather resistant engineered to survive freezing temperatures (-10 F); conditions that cause more conventional garden ware to crack and disintegrate. 413mm diameter.

WaterFeatures2U Price: £725.00
